What does your research show?

Patient Care is eager to review research done by its readers that could benefit other readers.

We are interested in studies that concern any aspect of patient care in family practice—from clinical problems to practical management. An informal paper that presents your "findings" on a given subject based on years of practical experience may be of great value to other physicians.

If your work is still uncommitted to paper, but you think it has merit, jot down an "abstract" of a few sentences, and perhaps we can develop a more detailed summary via a telephone interview with you. Write Editor, Patient Care, P.O. Box 1245, Darien, CT 06820.
